- 2 reservoirs: Kryukovskoye and Varnavinskoye.

Fertile lands

Total amount

71 691 ãà

- Agricultural land — 47,374 hectares.
- Arable land — 51,207 hectares.
- Perennial plantings — 2,635 hectares
- Hayfields — 2,142 hectares.
- Pastures — 6,961 hectares.

Recreational resources

- The Kuban river floodplain is of interest in the development of a recreational area.
- On the banks of the river, near Abinsk district, there is a pine grove, ponds in the villages of Vasilievskiy and Pokrovskiy. They are well-known for its wildlife and lotus flowers.
- An appealing hunting spot is the steppe reservoir called Borisinkovsky Estuary located behind the village of Krasny Oktyabr. This reservoir is fed by springs, maintains a constant water level and freshness, features blooming lilies, and is rich in wildlife such as ducks, geese, and swans.
- In the flat area of the district, there are two reservoirs, Kryukovskoye and Varnavinskoye, along with a connecting channel that is a popular spot for fishermen.
- A special place in recreational resources is held by mineral springs, which offer valuable therapeutic benefits. Groundwater reserves have not been fully investigated.
- The area of the hunting grounds is 8,044 hectares.
- Natural landmarks: Scots Pine Grove and Red Oak Grove. Markotkh regional natural park
- Regional natural landmarks include the alpine meadows of Lysykh mountains, Chubataya and Shize mountains, the mountain-geological

Big Shapsug Dolmen

Big Shapsug Dolmen is a type of funerary structure dating back to 1.5 thousand years BC. It is situated near the former channel of the Shapsugskaya river in Abinsk urban settlement. While similar structures can be found across Krasnodar region, only a few of them are well-preserved.

Glade of century-old oaks

Glade of Century-old oaks is a regional landmark and one of the main tourist attractions in Abinsk district. This unique natural spot is situated along the scenic Abinsk – Shapsugskaya road.

The oaks in this glade, symbolizing eternity and power, played an important role in the life of local mountain tribes, who turned to them for help and kept their sacred relics under their crowns

Mount Papay

Mount Papay, which is the highest point of the mountain range, called by the locals “Papaya Saw”, is of great interest to tourists. Despite its elevation of 818.8 meters above sea level, this peak and its surroundings attract an increasing number of travelers every year, not only from nearby areas but also from the entire region.

There are several plants listed in the Red Book of Krasnodar region, including the common beetle, berry yew, and tall juniper.

Stone mushrooms

Stone mushrooms are a fascinating natural wonder found in the beautiful Temnaya crevice, near Novy settlement. This unique landscape took shape over thousands of years during the formation of the mountains. The layering of various rocks like gravel, sand, and sturdy sandstone created a distinctive “pie” formation, which has been gradually eroded over time.

Adegoy waterfalls

The Adegoy waterfalls are situated in Ivanovsky Yar crevice on the left tributary of the Adegoy river, 7 kilometers away from the village of Shapsugskaya. These waterfalls are at their fullest from November to June, while their water flow significantly decreases during the summer months from July to September. The Adegoy waterfall complex comprises multiple waterfalls, with the most remarkable ones being the Big and Small Adegoy waterfalls.

Competitive advantages

Environmental and climatic conditions

- > The district benefits from a diverse range of natural resources
- > Favorable soil and climatic conditions support the growth of various agricultural products
- > Low risk of natural disasters
- > Abinsk district has the potential for resorts and recreational activities

Economic development

- Abinsk District has a fairly high level of economic development and is able to compete with municipalities in Krasnodar region
- Abinsk district is an attractive place to live and work
- The diverse economic structure of Abinsk district
- Developing connections between districts, enhancing regional cooperation
- Encouraging competition and reducing administrative obstacles
- Expanding the scope of manufacturing enterprises, fostering their interest in modernization and boosting labor productivity
- Availability of infrastructure for agriculture
- Developed a system of small-scale farming, which includes private farms
- The service sector has great potential

Business Support Infrastructure

- Abinsk district has a track record of successfully carrying out major investment projects and providing well-compensated employment opportunities
- Support of investment projects
- Experience in implementing large investment projects
- Providing consulting, information, and property support for small and medium-sized businesses, as well as individuals looking to start their own business
- Support infrastructure for small and medium-sized businesses
- Developed financial and credit sphere

Success stories

Construction of Abinsk Electrometallurgical Plant

Investor
Abinsk
Electrometallurgical
Plant LLC

Implementation
timeline:
2008-2024

Number of new jobs:
4000

Abinsk Electrometallurgical Plant is actively growing and supplying its products not only to our region but also to other parts of the country and abroad. It stands out as one of the most advanced and progressive plants in Russia. The plant's workshops are equipped with automated process control systems. To embrace digital transformation, a pilot project is underway to incorporate cutting-edge IT technologies in collaboration with the Skolkovo Innovation Center. Spanning 120 hectares, the plant employs over 4,000 individuals.

In 2024, the plant is continuing to develop new types of steel profiles and grades. The company is not only focused on replacing imported steel products in the Russian market but also on developing its own steel grades with special chemical compositions. These, along with innovative technologies, ensure that the steel products meet the specific needs of customers.

Growing apples using modern technologies

Investor

OOO ALMA
PRODUCTION

Implementation
timeline:

2007-2020

Volume of
investments:
2.3 billion
rubles

OOO ALMA PRODUCTION started an agricultural project in cooperation with European investors in Krasnodar region in 2007. The company grows apples of Breben, Gala, Fuji, Simirenko, Aidared, Golden, Red, and Grenny Smith varieties. The total area of the orchard is 391 hectares.

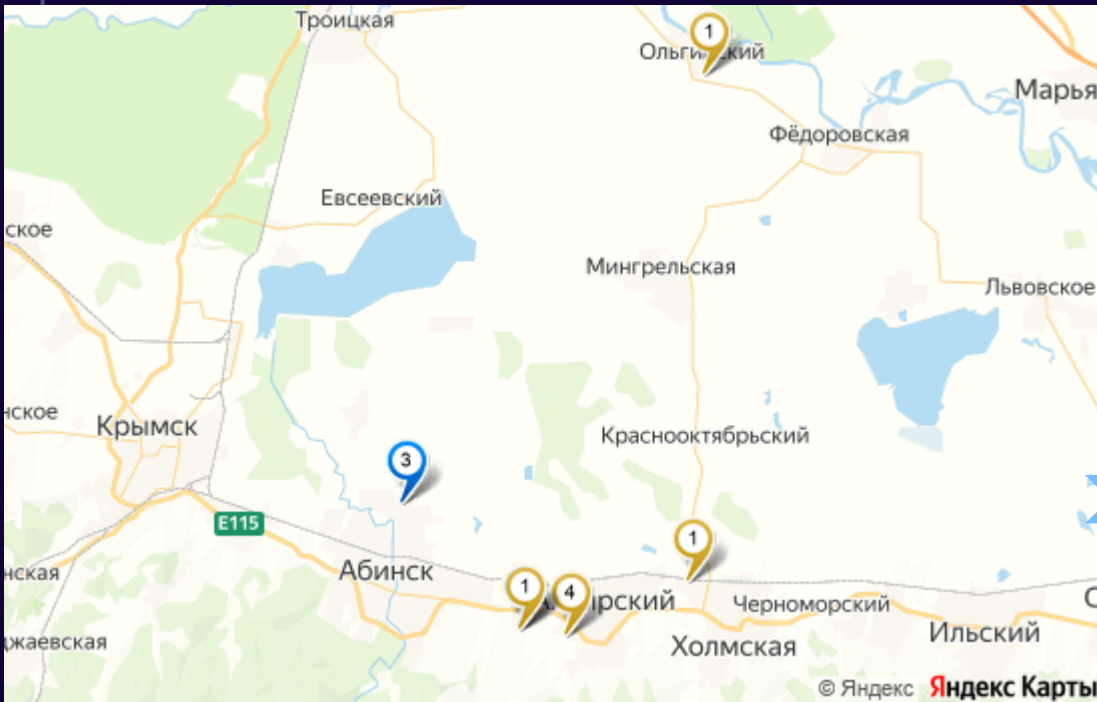

The gardens are organized using advanced techniques like trellis systems and drip irrigation. Along with a strong focus on horticulture, modern methods for storing and sorting apples are employed. The products are distributed across the Russian Federation.

Since 2007, projects like “Planting apple orchards,” “Building a fruit processing facility,” and “Constructing a facility for storing, sorting, packing, and processing fruit” have been completed. To further develop the enterprise in the upcoming years, there are plans to establish new orchards and construct a fruit storage facility capable of storing 10,000 tons at once.
